Really powerful! Especially when you get a headshot!. It's a nice little game, but so far the only strategy against the AI has been level up your starting cell(s) before anything else, and eat some of their floaty lights with your cell. Who cares if you take a bit of damage, you get ahead and start rolling.. Good game, fun, but too many people forget the spirit and spam weapons on their ships.. This is just excellent ! The VR setup is well done and the UI is just fitting the RTS genre. It is not as simplistic as you could think when you start the game. There is a lot of challenge in the game and the multiplayer is just very good. I do not know why my play time is low as I have been playing a few hours :) Definitely recommend this game if you are into old shool RTS with ressource management, fleet management and ship customization

. i am ashamed about how long i've played this. This game would not be so bad, if the puzzle pieces actually fit together. But for real, the puzzle pieces did not even fit together.

cute dogs tho.

Fun little game for 3 bucks, weird that the reviews aren't better. Will be throwing people in this for live demos for sure.. I ride everyday and ride a CBR1000 so I soooo stocked to have a game other than the Moto GP series with real bikes. The only disappointment was the game is not optimised for the PC. My alienware laptop has 8Gig Ram and i7 intel and a nvidia graphic card and it barely runs on min specs.....But I play Ryse that is just as good on my PC than it is on the Xbox One!!!! So I am very disappointed I can't enjoy this game. Please optimise for the PC not just for the PS4 that this game is also on. Most of my PC games that are new like FarCry 3 and 4 and Dark Souls 2 runs sooooooo good on the PC and Skyrim is amazing!!!! and they are open world!!! why can't this game run when its a simple arcade racer? Anyway if you are a bike fan this just cool to look at the bikes and is simple fun. If you are not a bike fan, ride the bikes in Watch dogs or GTA it would be way more fun than this game.. I'm old enough to say this is great Cold War game !. great skins!

but....

play with each one of them just when finished the game is really, really really stupid, insanely stupid.. Based on my experience, when a HOG comes out from Gogii Games, we are to expect either a real treat, close in standard to Artifex Mundi, or a complete waste of time that would make you pull your hair out with frustration. For *Voodoo Whisperer: Curse of a Legend*, I sincerely cannot decide what to say. It is neither of our expected choices. There are good things and bad things to say about this game, but they kinda even each other out at the end.

*The curtain opens up to 1930s New Orleans, Louisiana. After witnessing a sacrifice between a Voodoo priestess named Marie Leveau and her young apprentice Lillian, it takes a brief moment for us to understand what's going on. It seems that Marie Leveau and many other residents of New Orleans fell victim to a curse, and all hope rests on Lillian's frail shoulders to solve the mystery, save residents and confront the responsible villain. So, as an apprentice Voodoo practitioner, Lillian ventures out to do all that is expected from her.*

*The setting and background artwork are really interesting. Anecdotes specific to New Orleans are scattered all around and Haitian Voodoo culture is a great pick to make a HOG game out of. Character animations, on the other hand, are little more than illustrated blocks, moving as broken puppets would do. There is no lip movement to match voice recording at all. Characters just stay around to look surprised and mysterious while a mediocre voice acting follows during cinematics. Game menu can only be reached from the map, and the map itself is rather unnecessary since it only shows acts of the game, rather than usable places in an act.*

*There is little to no puzzle sequences: 2-3 matching games, a pipe game and 2 rotation games. There is no challenge to neither of them. That's about it. HOG scenes are pretty imbalanced too - 12 or so obvious items and 3 impossible even in a million years items - , with a favoritism for British vocabulary, rather than American. There is no cookie jar, yet there is a biscuit box. So be warned. One adventure element that I've come to like is Lillian's Grimoire: we collect recipes for spells and voodoo dolls that we have to gather items for, and combine them to cast a spell to progress. The Grimoire also contains some lore about Haitian Loa spirits like Maman Brigitte, Shango, Ogoun and Legba... and it all comes to an end within 2 hours. That's it.*

*One fair warning: the ending is no ending at all. The game stops at a bad cliffhanger and declares "to be continued". Sadly, there has never been a sequel, and the development team parted its ways with Gogii Games. So there is little to no hope for Lillian's story to continue. There are tons of unanswered questions and irrelevant sub stories that get away without closure. As a side note, one whole act of the game is completely cut out in this version - The Hotel. The game progresses right down to the Bank after the Bar, and leaves already frustrating storyline with more holes. If you'd prefer the complete version, go to Big Fish Games to give this game a try.*

*These are all common perils to HOG genre, I know. But it seems I've become picky after playing Artifex Mundi games. Considering the story has huge continuation problems and the Steam version is missing a whole part of the game, I'll end up giving this game a downvote when I think of many elaborately developed HOGs with complete stories out there. Maybe I'll update my review in the future... come to think of it, maybe not.*
